

AP 366 – INDOOR RECESS/NOON RECESS PERIOD

BACKGROUND

During periods of severe weather, it may be necessary for the principal (or designate) to declare an indoor recess and/or indoor noon recess to protect student safety and well-being. The principal (or designate) is responsible for monitoring weather conditions using current data from Environment Canada.

PROCEDURES

1. An indoor recess / indoor noon recess must be announced when the temperature, including the wind chill reaches -27C or colder.
2. If the principal (or designate) receives a weather watch or warning that presents a safety concern for students outdoors an indoor recess / indoor noon recess will be declared.
3. Saskatoon Public Schools works closely with the City of Saskatoon's Emergency Measures Organization. The division will respond promptly to any safety measures or recommendations issued by this agency and schools are expected to follow any division direction that results from those recommendations.
